Mir Sameen Hasnat

Vancouver, BC | (639)-384-0069 | hasnatsameen@gmail.com | Linkedin

Education

University of British Columbia, Canada — *Average: 86%*

B.A.Sc, Electrical Engineering (2nd Year) — *Expected Graduation: 2029*

- *Dean's List (Fall 2026)*

Walter Murray Collegiate, Canada — *Average: 96%*

- *Higher Honor Roll (2024, 2025)*

Maple Leaf International School, Bangladesh — *Average: 94%*

- *PASCH Juku Camp Scholarship trip to Germany (2019)*
- *Edexcel High Achiever's Award (2023), Daily Star Awards (2023, 2024), and 100% Yearly Academic Scholarship (2023, 2024)*

Experience

Production Worker | *Floform Industries* — *Jul 2026 - present*

- Created CAD designs of countertops for clients and customers according to kitchen dimensions, as well as retailers such as Rona and Ashly
- Fabricated countertops through cutting according to dimensions with the help of power tools such as Top Saws, Table Saws and Staple Guns

Electrical Engineer | *UBC Agrobots* — *Jan 2026 - present*

- Engineered an automated robot, with refined power systems that is run using NVIDIA Jetson Orin Developer Kit for AI controlled automation and ESP32 for motor and component control
- Researched efficient ways to incorporate a variety of different components with variable power ratings, to be powered by a 48V Battery using components such as Buck Converters and Bus Bars while creating circuit schematics for PCB design
- Operated with team of engineers to create the flagship Agrobot, through proper documentation and organization across multiple sub-teams

Market Research Interviewer | *Access Research* — *Aug 2023 - Aug 2025*

- Completed multiple surveys on behalf of institutions such as colleges, Toronto Police service, and multiple public and private sector organizations at a communication and customer service rating of 92%
- Conducted field research and data collection for media and communication developments

Treasurer and Teaching Assistant | *MLIS Robotics Club* — *Aug 2022 - July 2023*

- Taught a year long robotics course (in school) for more than 100 students on Arduino IDE
- Organized a workshop on PC Building sponsored by Corsair for more than 300 students
- Established a startup by producing and selling robotics parts for the club and led it to it's first ever profits

Personal Projects

Scribble Pad | *Java*

- *Winner of the Upcoming Design Idea at The Tech Lab Programming Competition (2021)*
- Applied mouse and touch tracking to allow note taking and drawing on computers and tablets, as well as note documentation

Mars 2.0 | *Arduino IDE, C++, CAD Modelling, Tinkercad*

- *Winner of the MLIS Science Fair (1st Place), Boipori.com Innovation Award and American Embassy Project Exhibition (3rd Place) (2020)*
- Motion and obstacle detection to navigate through tight spaces incase of earthquake damages
- Automatic surveillance using servo-controlled camera
- Bluetooth controlled communication that allows manual override of vehicle motion within 1.5 km

Bladder Buddy | *C++, E-CAD, LT Spice, ESP32*

- *Special Recognition at the UBC Design Team Competition (2026)*
- Automatic monitoring of urine content, such as protein and pH monitoring to diagnose health problems from public urinals
- Self-designed protein and pH monitoring sensors with GUVA UV sensor, pH sensor probe and disc motors
- Reduced pre-screening wait times from 2-3 business days to 2 minutes

Feetball | *C++, LT Spice, ESP32, CAD*

- Bluetooth controlled robot that can dribble a soccer ball and navigate through a playing field
- Uses solenoids to generate power through electromagnetism to portay "kicking" and has power management with the use of Buck Converter

Technical Skills

Language: *C, C++, Java, Python, MATLAB*

Hardware and Embedded Systems: *Arduino, ESP32, RLC Circuits*

Design: *Fusion, Adobe Creative Suite, Canva, Tinkercad, LT Spice*
